In response to the global turn in scholarship on colonial and early modern history, the eighteen essays in this volume provide a fresh and much-needed perspective on the wider context of the encounter between the inhabitants of precolonial Virginia and the English. This collection offers an interdisciplinary consideration of developments in Native America, Europe, Africa, the Caribbean, and the Chesapeake, highlighting the mosaic of regions and influences that formed the context and impetus for the English settlement at Jamestown in 1607. The volume reflects an understanding of Jamestown not as the birthplace of democracy in America but as the creation of a European outpost in a neighborhood that included Africans, Native Americans, and other Europeans. With contributions from both prominent and rising scholars, this volume offers far-ranging and

compelling studies of peoples, texts, places, and conditions that influenced the making of New World societies. As Jamestown marks its four-hundredth anniversary, this collection provides provocative material for teaching and launching new research. Contributors: Philip P. How do you govern 130,000 people from exile? Tibet - and the struggles of diaspora Tibetans - are elements of an ongoing and highly debated issue. The Dalai Lama's democratisation process during his time in India from 1959-2011, and the subsequent election of Lobsang Sangay as prime minister-in-exile, marked to the Tibetan people the move away from a seemingly feudal societal structure and traditional theocratic governance. Central to these Tibetan democracy aspirations is the 'freedom struggle' in which Tibetans dream of an ideal politics which includes both Tibetans residing in Tibet and those in exile, with the ultimate goal of returning to a self-ruled Tibet. However, some have questioned whether the fight for democracy has helped or hindered a united and free Tibet. To elucidate this complex debate Trine Brox has undertaken extensive fieldwork investigating how democracy is viewed and practised amongst Tibetans in exile. In so doing, she explores how the Tibetans living in India imagine, organise and negotiate governance that is modern and democratic, but uniquely Tibetan. This is an important book for those with an interest in Tibet, diaspora communities and democracy.

Angkor, the temple and palace complex of the ancient Khmer capital in Cambodia is one of the world's most famous monuments. Hundreds of thousands of tourists from all over the globe visit Angkor Park, one of the finest UNESCO World Heritage Sites, every year. Since its UNESCO listing in 1992, the Angkor region has experienced an overwhelming mushrooming of hotels and restaurants; the infrastructure has been hardly able to cope with the rapid growth of mass tourism and its needs. This applies to the access and use of monument sites as well. The authors of this book critically describe and analyse the heritage nomination processes in Cambodia, especially in the case of Angkor and the temple of Preah Vihear on the Cambodian/Thai border. They examine the implications the UNESCO listings have had with regard to the management of Angkor Park and its inhabitants on the one hand, and to the Cambodian/Thai relationships on the other. Furthermore, they address issues of development through tourism that UNESCO has recognised as a welcome side-effect of heritage listings. They raise the question whether development through tourism deepens already existing inequalities rather than contributing to the promotion of the poor.

In 2007 English Heritage commissioned initial research into links with transatlantic slavery or its abolition amongst families who owned properties now in its care. This was part of the commitment by English Heritage to commemorate the bicentenary of the abolition of the British transatlantic slave trade with work that would make a real difference to our understanding of the historic environment in the longer term. The research findings and those of other scholars and heritage practitioners were presented at the 'Slavery and the British Country House' conference which brought together academics, heritage professionals, country house owners and community researchers from across Britain to explore how country houses might be reconsidered in the light of their slavery linkages and how such links have been and might be presented to visitors. Since then the conference papers have been updated and reworked into a cutting edge volume which represents the most current and comprehensive consideration of slavery and the British country house as yet undertaken.

The diversity of ideology studies is represented by a mixture of the range of theories that illuminate the field, combined with an appreciation of the changing complexity of concrete ideologies and the emergence of new ones. Ideologies, however, are always with us. The Handbook is divided into three sections: The first is divided into three sections: The first reflects some of the latest thinking about the development of ideology on an historical dimension, from the standpoints of conceptual history, Marx studies, social science theory and history, and leading schools of continental philosophy. The second includes some of the most recent interpretations and theories of ideology, all of which are sympathetic in their own ways to its exploration and close investigation, even when judiciously critical of its social impact. This section contains many of the more salient contemporary accounts of ideology. The third focuses on the leading ideological families and traditions, as well as on some of their cultural and geographical manifestations, incorporating both historical and

contemporary perspectives. Each chapter is written by an expert in their field, bringing the latest approaches and understandings to their task. Nancy Love's concise yet complete volume aims to inform students of their choices among political values. By exploring the assumptions of various ideologies and comparing their positions, students begin to understand political alternatives to be able to choose among them—in essence, they learn to think democratically. Offering historical and analytic context for the selections in her companion reader, *Dogmas and Dreams*, Love challenges students to consider the various ways ideological frameworks shape political actions. Reframing her approach in this second edition, Love examines how traditional left/right ideologies—liberalism and conservatism, socialism and fascism—are shifting to adapt to new political realities in an ever turbulent, post-9/11 world. She also discusses why alternative ideologies—feminism, environmentalism, fundamentalism, and globalization—may better convey our global political future. While pushing the boundaries of the left/right political spectrum, she looks at how grassroots social movements offer alternative ways to view ideological differences, from cluster-concepts to micro-discourses, and even a planetary galaxy. Expanded coverage includes: a new chapter on nationalism and globalization, which examines the work of Samuel Huntington, Kenichi Ohmae, Benjamin Barber, and many more, to explore fundamentalism in Islamic politics increased coverage of global environmental politics, including Shiva's *Stolen Harvest* and Kelly's *Thinking Green*, examining the relationships between developed and developing countries fresh material on socialist politics post-1989 and the rise of neo-fascist movements in the United States and Europe, including analysis of Hayden and Flacks' "The Port Huron Statement at 40" and Bob Moser's "The Age of Rage" an updated feminism chapter that considers the impact of third-wave, post-colonial, and so-called "power" feminists and incorporates new analysis of Wollstonecraft's *A Vindication of the Rights of Woman* and Mohanty's *Under Western Eyes Revisited* A thinking person's package... Nancy Love wrote *Understanding Dogmas and Dreams* with her edited collection in mind—the two work together as a seamless package and give students great value for their money. The Open Access version of this book, available at <http://www.tandfebooks.com/>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. There has been an enormous increase in interest in the use of evidence for public policymaking, but the vast majority of work on the subject has failed to engage with the political nature of decision making and how this influences the ways in which evidence will be used (or misused) within political areas. This book provides new insights into the nature of political bias with regards to evidence and critically considers what an 'improved' use of evidence would look like from a policymaking perspective. Part I describes the great potential for evidence to help achieve social goals, as well as the challenges raised by the political nature of policymaking. It explores the concern of evidence advocates that political interests drive the misuse or manipulation of evidence, as well as counter-concerns of critical policy scholars about how appeals to 'evidence-based policy' can depoliticise political debates. Both concerns reflect forms of bias – the first representing technical bias, whereby evidence use violates principles of scientific best practice, and the second representing issue bias in how appeals to evidence can shift political debates to particular questions or marginalise policy-relevant social concerns. Part II then draws on the fields of policy studies and cognitive psychology to understand the origins and mechanisms of both forms of bias in relation to political interests and values. It illustrates how such biases are not only common, but can be much more predictable once we recognise their origins and manifestations in policy arenas. Finally, Part III discusses ways to move forward for those seeking to improve the use of evidence in public policymaking. It explores what constitutes 'good evidence for policy', as well as the 'good use of evidence' within policy processes, and considers how to build evidence-advisory institutions that embed key principles of both scientific good practice and democratic representation. Taken as a whole, the approach promoted is termed the 'good governance of evidence' – a concept that represents the use of

rigorous, systematic and technically valid pieces of evidence within decision-making processes that are representative of, and accountable to, populations served.
