Moto-journalist Clement Salvadori has been riding motorcycles since the age of 15 and traveling all of his life, accumulating well over a million miles in the saddle across more than 70 countries on six continents. No Thru Road covers 30 different trips he has taken, to places like Afghanistan and Zimbabwe, since his first ride through western Europe in 1957. The stories are all original, though the subject may have appeared as a magazine article in a very different rendition. The book will appeal to adventure-travel enthusiasts and to motorcyclists and travelers of all persuasions. Adventurous riders will thoroughly appreciate the book, as in the description of kick-starting a 500cc single - never easy to do - at 17,200 feet in the Tibetan Himalayas. Or going up to Cape Tribulation in Australia's Queensland in 1974 when the only access was via a once-a-week ferry across the Daintree River. Or riding a bike to Pamplona, Spain, in 1960 in order to run with the bulls. Activists who want to get on their motorcycles and ride down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can open the book to any chapter, be it

“This heartfelt, witty addition to women’s fiction will appeal to fans of Elizabeth Berg and Anna Quindlen.” (Booklist) Georgia Waltz has things many people only dream of: a plush Manhattan apartment overlooking Central Park, a Hamptons beach house, valuable jewels and art, two bright daughters, and a husband she adores, even after decades of marriage. It’s only when Ben suddenly drops dead from a massive coronary while training for the New York City Marathon that

Georgia discovers her husband—a successful lawyer—has left them nearly penniless. Their wonderland was built on lies. As the family attorney scours emptied bank accounts, Georgia must not only look for a way to support her family, she needs to face the revelation that Ben was not the perfect husband he appeared to be, just as her daughters—now ensconced back at home with secrets of their own—have to accept that they may not be returning to their lives in Paris and at Stanford subsidized by the Bank of Mom and Dad. As she uncovers hidden resilience, Georgia's sudden midlife shift forces her to consider who she is and what she truly values. That Georgia may also find new love in the land of Spanx and stretch marks surprises everyone—most of all, her. Sally Koslow's fourth novel is deftly told through the alternating viewpoints of her remarkable female protagonists as they plumb for the grit required to reinvent their lives. Inspiring, funny, and deeply satisfying, *The Widow Waltz* explores in a profound way the bonds between mothers and daughters, belligerent siblings, skittish lovers, and bitter rivals as they discover the power of forgiveness, and healing, all while asking, "What is family, really?"

" ... Join the adventure as 33-year-old Rene Cormier politely removes himself from the working world that surrounds him and cashes in what few possessions he has to finance a three-year-long motorcycle journey around the world. Never

one to let excessive planning get in the way of a good ride, Rene runs out of money half way through the tour and ultimately takes five years to cover his 154,000-kilometre (95,000 mile) route. ..."--Book flap.

Ever wondered what Spock would look like on a baby's onesie? Well, now you can view this fun and entertaining collection of thirty cross-stitch projects made with love from Star Trek fans. If you're looking for ideas for putting your favourite Star Trek character on a tote bags or pillow-or perhaps making a lovely "Qo'noS Sweet Qo'noS" framed sign in the entryway to let everyone know that a Klingon-speaker lives here, then look no further. Star Trek Cross-Stitch not only showcases some of the fans' biggest creations, it also includes pattern images and photos of every finished project in use by the creator themselves. Ten of the projects include alternate patterns as well, just in case you'd prefer to see another quotable phrase on your stitched bookmark, or a different cast of characters on your dish towel.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their

bike, or their kid's, handle like a pro's. The book gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

A distinction is made in formal semantics between "stage-level predicates," predicates that describe the general state of a noun, and "individual-level predicates," predicates that specify the specific properties of a noun. Fernald investigates various contexts in which this distinction is traditionally said to come into play. His aim is to show that the effects displayed are not uniform, and that the differences between the analyses proposed in the literature arise from the authors considering different subsets of data that they take to exemplify the "core" meaning of the stage/individual distinction. Fernald presents alternatives and extensions that shed light on the limitations of previous theories, as well as making original observations about important aspects of the topic, including coercion, and perceptual reports vs. other phenomena.
