One Federal Rule of Evidence introduces each section, followed by text explaining the background, rationale, and details of the rule. The text includes numerous diagrams as visual aids to learning and short transcripts that illustrate how the rules are applied in the courtroom. The authors emphasize the rules over cases, but include edited versions of some judicial opinions, including the seminal cases that every lawyer should know. Increasing the designer's confidence that a piece of software or hardware is compliant with its specification has become a key objective in the design process for software and hardware systems. Many approaches to reaching this goal have been developed, including rigorous specification, formal verification, automated validation, and testing. Finite-state model checking, as it is supported by the explicit-state model checker SPIN, is enjoying a constantly increasing popularity in automated property validation of concurrent, message based systems. SPIN has been in large parts implemented and is being maintained by Gerard Holzmann, and is freely available via ftp from [netlib.bell-labs.com](ftp://netlib.bell-labs.com) or from URL <http://cm.bell-labs.com/cm/cs/what/spin/Man/README.html>. The beauty of finite-state model checking lies in the possibility of building "push-button" validation tools. When the state space is finite, the state-space traversal will eventually terminate with a definite verdict on the property that is being validated. Equally helpful is the fact that in case the property is invalidated the model checker will return a counterexample, a feature that greatly facilitates fault identification. On the downside, the time it takes to obtain a verdict may be very long if the state space is large and the type of properties that can be validated is restricted to a logic of rather limited expressiveness.

Good news! This book is your first step toward your independence from fear and anxiety about having a repair issue with your vehicle. No experience necessary! And no tools! You're not going to learn to be a certified technician; rather, I will teach you about your vehicle and the important parts of the vehicle that you need to keep an eye on. I will guide you to where you can get the information about your vehicle that you are going to need to know and the manufacturer wants you to have. No Internet or cell phone necessary. We are going to look at ways to understand the issue with your vehicle and then clearly communicate that information to the repair shop. We will take it slow and cover all the basics. As we move forward, I'll add a layer of relevant information, adding in some cases to what you have already learned. We will avoid information overload or paralysis from analysis. Knowledge is king. Gone are the days of "I only put gas in it." From reading and referring to this book, you are going to understand and be able to take control of your vehicle's wellness and repair. Congratulations!

The Government's draft Consumer Rights Bill has the potential to consolidate, simplify and modernise consumer law however issues and inconsistencies must be resolved. The current proposals would apply a statutory right that services under a contract must be provided with reasonable care and skill [a fault-based standard]. This does not provide sufficient consumer protection. The Draft Bill should require that services must achieve the stated result, or one which could be reasonably expected [an outcomes-based standard]. As the Bank of Ireland case demonstrated, the right to terminate a contract does not necessarily protect consumers from detriment. This report recommends an addition to the grey list - the indicative list of contract terms which may be regarded as unfair. The Government's proposals for enhanced consumer measures, which would require traders

that have breached consumer law to compensate consumers, are welcome. However, private enforcers should also be able to use them. The collective proceedings regime has the potential to improve access to redress for victims of competition law breaches but the Government must clarify the certification requirements for such proceedings. The creation of rights and remedies for digital content is welcome, but the Government must do more to communicate how the proposals will work in practice. Under the draft Bill, the remedies available to consumers of digital content would depend on whether the content is intangible (such as a music download) or tangible (such as a CD). In appropriate circumstances, consumers should have the right to reject and obtain a refund irrespective of whether they purchase intangible or tangible digital content
