eight years later he made his brainstorm in the potato field a reality by transmitting the world's first television image. **Background:** Teachers who work with English as a Second Language (ESL) students, struggle with promoting discussion during guided reading. When ESL students are asked comprehension questions during group discussions and throughout the reading of a book, often teachers receive minimal feedback. **Purpose:** The purpose of this research is to identify effective discussion strategies that may help ESL students contribute to meaningful class discussions about their reading. **Setting:** The students in the research attended a public elementary school in a suburban neighborhood in northeastern United States. The research took place in a third grade classroom for approximately one month. **Study Sample:** The students in the research were two boys and two girls in third grade. They participated in the school's ESL program. **Intervention:** Anticipation guides were implemented during guided reading twice. Four statements were created on sheets of paper that related to the story with columns for students to decide whether they agreed or disagreed. Strategies were modeled to illustrate how students could respond to the first statement and how they could make connections to previous experiences. Students recorded their reactions to the statements, read the book, and had opportunities to discuss their responses. **Research Design:** Experimental. **Data Collection and Analysis:** The data collection includes a teacher survey and interview, guided reading pre & post observation notes, pre & post group discussion checklists, and student interviews. **Findings:** Anticipation guides brought forth high levels of discussion and were appreciated by the students, based on the student interviews and post strategy observation. It was easy for students to state their opinions on the statements included in the guides and refer back to them to discuss their reasons for agreeing or disagreeing. **Conclusion:** To narrow students' learning gaps, strategies that will allow for building background knowledge in students who bring diverse cultural differences should be implemented. Anticipation guides certainly build knowledge, motivation, comprehension, and discussion. **Citation:** Echevarria, J., & Short, D. (2004/2005). When Grandma was a little girl in Mississippi, she sneaked into town one day. It was a hot day—the kind of hot where a firecracker might light up by itself. The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are

not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.
