

Part Iii Of The Cica Handbook Accounting

In a global environment of constant change, students learning accounting need to be able to think critically about the issues facing organizations. While accounting textbooks provide the technical foundation, cases reinforce the concepts and challenge students to identify alternatives, and discuss and provide recommendations. Canadian Financial Accounting Cases has been developed to bridge the gap between the foundational concepts and the real world. Students are introduced to the case study methodology for financial accounting, which focuses on identifying the issue, understanding implications, developing alternatives, and making recommendations. In addition, one chapter is devoted to debriefing a case study, providing valuable tips for students wishing to pursue accounting designations after graduation. The cases range from introductory level to advanced level and are meant to be used as assignment cases or for in-class discussion. The cases have been developed using IFRS (CICA Handbook, Part I), ASPE (CICA Handbook, Part II), and ASNPO (CICA Handbook, Part III) as the accounting frameworks, providing students with exposure to many different types of organizational structures. Instructors are provided with detailed teaching notes that will assist in guiding the class discussions.

Inhaltsangabe:Abstract: Electronic Commerce, once thought of as futuristic buzzwords, is becoming a commonly used term. International newspapers, magazines, and the electronic media mention at least some forecast or news related to this subject on a daily basis. Nevertheless, a look at the growing numbers of consulting companies, that offer a variety of services relating to Electronic Commerce reveals the immense uncertainty companies are experiencing about what exactly Electronic Commerce is, and how they can implement it. While it seems that the importance of this issue in the business environment is widely accepted in the US, a recent study from Andersen Consulting (Andersen, 1998) shows that among European senior executives only 19% regard Electronic Commerce as a serious competitive threat to their business. Furthermore, only 39% are taking steps today to incorporate Electronic Commerce into their current operational strategies. There is a number of factors contributing to the "wait-and-see" attitude taken by executives and consumers as well. Executives tend to view the rise of Electronic Commerce as an external business environment issue, while consumers are concerned about security issues. These are still common views in the US. In European countries, a cultural problem stemming from a slowly changing and stable business environment adds to that problem. Fear of failing by trying a new approach, in most cases, overshadows the willingness to take new risks. Nevertheless, the uncertainty about the changes implied by Electronic Commerce are far-reaching and can be found in any country. With the increasing importance of the Internet, the business environment, as well as other areas in society, is about to fundamentally change. Old paradigms are no longer working in the evolving new business world, sometimes called digital economy. Electronic Commerce is the keyword that tries to capture the new paradigms which are not even clear yet. The only thing that is reliable and predictable about Electronic Commerce and the new economy, is change. Never before was it more important to be flexible and willing to take risks by trying new approaches. As businesses like to operate in a predictable environment where planning the future is easy, it becomes very difficult to adapt to the pace of change. Not only do businesses need new strategies, they also need to constantly reinvent themselves. Businesses need to realize, that it becomes necessary to accept [...]

This book discusses capital markets and investment decision-making, focusing on the globalisation of the world economy. It presents empirically tested results from Indian and Southwest Asian stock markets and offers valuable insights into the working of Indian capital markets. The book is divided into four parts: the first part examines capital-market operations, particularly clearance and settlement processes, and stock market operations. The second part then addresses the functioning of global markets and investment decisions; more specifically it explores calendar anomalies, dependencies, overreaction effect, causality effect and stock returns volatility in South Asia, U.S. and global stock markets as a whole. Part three covers issues relating to

capital structure, values of firm and investment strategies. Lastly, part four discusses emerging issues in finance like behavioral finance, Islamic finance, and international financial reporting standards. The book fills the gap in the existing finance literature and helps fund managers and individual investors make more accurate investment decisions.

At a time when many alliances are being called into question, this volume considers the present and historical realities of the global U.S. alliance network. Ironclad contributes to the scholarly, political, and policy debate on alliance theory, examining the theoretical underpinnings of why states align, the effects of nuclear weapons on alliance alignment, and the implications of the cyber domain for alliances. Ironclad further informs the reader on the practice of alliance management in the twenty-first century, with studies of the U.S. alliance system in Asia and Europe. Sure to be of use to scholars, students, and policy practitioners alike, Ironclad is a definitive examination of the value and role of alliances in the twenty-first century.
